

Chuck Rebuilding

Trust Your Chuck Repairs to EB Manufacturing

EB Manufacturing is a leader in repairing and rebuilding chucks, lathe hydraulic cylinders, pneumatic actuators, collet chucks and mandrels. When EB Manufacturing repairs your chuck, you can be sure that the work will be completed to new or better-than-new specifications. The EB staff gives the utmost attention to every repair.

After the workholding tool is disassembled, it is inspected to determine the extent of repairs needed. A quote for the cost of repair or rebuilding is then provided to the customer for approval before the work is done.

With our many years of experience in designing and building chucks, actuators and cylinders, we

can recommend the most cost-efficient solution for your workholding needs. We can also offer rebuilt chucks in both standard and custom configurations that may be right for your new applications. For your next repair, we invite you to put your trust in our expert service.

EB is a leader in repairing many brands, including:

- Forkhardt
- Gamet
- Howa
- Kitagawa
- Nikko
- Powerhold
- Rohm
- Schunk
- SMW/Autoblok
